

# Design, Build, Fly Creative Project

## About

The Design, Build, Fly competition is sponsored by Cessna Aircraft Company and Raytheon Missile Systems Company; managed by the American Institute of Aeronautics and Astronautics (AIAA) Foundation. It is an international competition where students design, build, and fly their aircraft against other universities and colleges around world. Although the aircraft must be electrically powered using nickel compound batteries, the competition themes change drastically from year-to-year. Typically, over 80 teams (around 20 of which are international) remained eligible to compete in the fly-off, at the annually alternating sites of Wichita and Tucson.
